# **ADVANCE MANUAL SMART CONTRACT AUDIT**

**Project:** Popo The Genie

**Website:** <https://popotoken.com/>

**BlockSAFU Score:**

**82**

**Contract Address:**

**0x89E0974d1a21043381d5722AA5Efad36dA03cA1E**

Disclaimer: BlockSAFU is not responsible for any financial losses.  
Nothing in this contract audit is financial advice, please do your own reasearch.

## DISCLAIMER

BlockSAFU has completed this report to provide a summary of the Smart Contract functions, and any security, dependency, or cybersecurity vulnerabilities. This is often a constrained report on our discoveries based on our investigation and understanding of the current programming versions as of this report's date. To understand the full scope of our analysis, it is vital for you to at the date of this report. To understand the full scope of our analysis, you need to review the complete report. Although we have done our best in conducting our investigation and creating this report, it is vital to note that you should not depend on this report and cannot make any claim against BlockSAFU or its Subsidiaries and Team members on the premise of what has or has not been included in the report. Please remember to conduct your independent examinations before making any investment choices. We do not provide investment advice or in any way claim to determine if the project will be successful or not.

By perusing this report or any portion of it, you concur to the terms of this disclaimer. In the unlikely situation where you do not concur to the terms, you should immediately terminate reading this report, and erase and discard any duplicates of this report downloaded and/or printed by you. This report is given for data purposes as it were and on a non-reliance premise and does not constitute speculation counsel. No one should have any right to depend on the report or its substance, and BlockSAFU and its members (including holding companies, shareholders, backups, representatives, chiefs, officers, and other agents) BlockSAFU and its subsidiaries owe no obligation of care towards you or any other person, nor does BlockSAFU make any guarantee or representation to any individual on the precision or completeness of the report.

### ABOUT THE AUDITOR:

BlockSAFU (BSAFU) is an Anti-Scam Token Utility that reviews Smart Contracts and Token information to Identify Rug Pull and Honey Pot scamming activity. BlockSAFU's Development Team consists of several Smart Contract creators, Auditors Developers, and Blockchain experts. BlockSAFU provides solutions, prevents, and hunts down scammers. BSAFU is a utility token with features Audit, KYC, Token Generators, and Bounty Scammers. It will enrich the crypto ecosystem.

## OVERVIEW

**BlockSAFU was commissioned by Popo The Genie to complete a Smart Contract audit. The objective of the Audit is to achieve the following:**

- Review the Project and experience and Development team
- Ensure that the Smart Contract functions are necessary and operate as intended.
- Identify any vulnerabilities in the Smart Contract code.

DISCLAIMER: This Audit is intended to inform about token Contract Risks, the result does not imply an endorsement or provide financial advice in any way, all investments are made at your own risk. (<https://blocksafu.com/>)

## SMART CONTRACT REVIEW

Token Name	<b>Popo The Genie</b>
Token Symbol	<b>PTG</b>
Token Decimal	18
Total Supply	10,000,000 <b>Phone</b>
Contract Address	0x89E0974d1a21043381d5722AA5Efad36dA03cA1E
Deployer Address	0x90550a4F523D152224eBbEfDE2e7785773A3f8FD
Owner Address	0x90550a4F523D152224eBbEfDE2e7785773A3f8FD
Tax Fees Buy	0%
Tax Fees Sell	15%
Gas Used for Buy	<i>will be updated after the DEX listing</i>
Gas Used for Sell	<i>will be updated after the DEX listing</i>
Contract Created	Aug-19-2022 10:43:43 AM +UTC
Initial Liquidity	<i>will be updated after the DEX listing</i>
Liquidity Status	Locked
Unlocked Date	<i>will be updated after the DEX listing</i>
Verified CA	Yes
Compiler	v0.8.15+commit.e14f2714
Optimization	Yes with 200 runs
Sol License	MIT License
Top 5 Holders	<i>will be updated after the DEX listing</i>
Other	default evmVersion

## TAX

<b>BUY</b>	0%	<b>SELL</b>	15%
<b>OperationsFee</b>	0%	OperationsFee	5%
<b>LiquidityFee</b>	0%	LiquidityFee	0%
<b>JackpotFee</b>	0%	JackpotFee	10%

## OVERVIEW

### Mint Function

- No Mint functions found

### Fees

- Buy 0%.
- Sell 15%.

### Tx Amount

- Owner cannot set max tx amount.

### Transfer Pausable

- Owner cannot pause.

### Blacklist

- Owner can blacklist.

### Ownership

- Owner cannot take back ownership.

### Proxy

- This contract has no proxy.

### Anti Whale

- Owner cannot limit the number of wallet holdings.

### Trading Cooldown

- Owner cannot set the selling time interval.

## Token Holder

Rank	Address	Quantity	Percentage	Analytics
1	0x90550a4f523d152224ebba0e2e7785773a318fd	1,000,000.000	100.0000%

## Team Review

The Popo The Genie team has a nice website, their website is professionally built and the Smart contract is well developed, their social media is growing with 4 people in their telegram group (count in audit date).

## Official Website And Social Media

Website: <https://popotoken.com/>

Telegram Group: <https://t.me/popogenie>

Twitter: <https://twitter.com/popogenie>

## MANUAL CODE REVIEW

### ● Minor-risk

1 minor-risk code issue found

Could be fixed, and will not bring problems.

1. The return value of an external transfer/transferFrom return value is checked.  
Recommendation: use SafeERC20, or ensure that the transfer/transferFrom return value is checked

```
function transferFrom(  
    address sender,  
    address recipient,  
    uint256 amount  
) external returns (bool);
```

### ● Medium-risk

0 medium-risk code issues found

Should be fixed, could bring problems.

### ● High-Risk

0 high-risk code issues found

### ● Critical-Risk

0 critical-risk code issues found

Must be fixed, and will bring problem.

## EXTRA NOTES SMART CONTRACT

### 1. IERC20

```
interface IERC20 {
    function totalSupply() external view returns (uint256);

    function balanceOf(address account) external view returns
(uint256);

    function transfer(address recipient, uint256 amount)
external
returns (bool);

    function allowance(address owner, address spender)
external
view
returns (uint256);

    function approve(address spender, uint256 amount) external
returns (bool);

    function transferFrom(
        address sender,
        address recipient,
        uint256 amount
    ) external returns (bool);

    event Transfer(address indexed from, address indexed to,
uint256 value);
    event Approval(
        address indexed owner,
        address indexed spender,
        uint256 value
    );

    function name() external view returns (string memory);

    function symbol() external view returns (string memory);

    function decimals() external view returns (uint8);
}
```

## 2. Ownable Contract

```
contract Ownable is Context {
    address private _owner;

    event OwnershipTransferred(
        address indexed previousOwner,
        address indexed newOwner
    );

    constructor() {
        address msgSender = _msgSender();
        _owner = msgSender;
        emit OwnershipTransferred(address(0), msgSender);
    }

    function owner() public view returns (address) {
        return _owner;
    }

    modifier onlyOwner() {
        require(_owner == _msgSender(), "Ownable: caller is not the owner");
        _;
    }

    function renounceOwnership() external virtual onlyOwner {
        emit OwnershipTransferred(_owner, address(0));
        _owner = address(0);
    }

    function transferOwnership(address newOwner) public virtual
    onlyOwner {
        require(
            newOwner != address(0),
            "Ownable: new owner is the zero address"
        );
        emit OwnershipTransferred(_owner, newOwner);
        _owner = newOwner;
    }
}
```

    sellTotalFees = sellOperationsFee + sellLiquidityFee +
sellJackpotFee;
    require(sellTotalFees <= 2000, "Must keep fees at 20% or
less");
}
```

#### Audit Result:

1. Owner can't set buy fee over 15%
2. Owner can't set sell fee over 20%

## 5. Tx Amount

```
function updateMaxSellAmount(uint256 newNum) external onlyOwner {  
    require(newNum >= ((totalSupply() * 25) / 10000) /  
    (10**decimals()));  
    maxSellAmount = newNum * (10**decimals());  
    emit UpdatedMaxSellAmount(maxSellAmount);  
}
```

Owner can't set max sell tx amount below 0.25% from total supply
