# **ADVANCE MANUAL SMART CONTRACT AUDIT**

**Project: INDEPENDENT**

**Website: <https://idpd-token.com/>**

**BlockSAFU Score:**

**28**

**Contract Address:**

**0x9f6bc12147513e1b05802bb09b129Edcd3819C65**

Disclaimer: BlockSAFU is not responsible for any financial losses.  
Nothing in this contract audit is financial advice, please do your own reasearch.

## DISCLAIMER

BlockSAFU has completed this report to provide a summary of the Smart Contract functions, and any security, dependency, or cybersecurity vulnerabilities. This is often a constrained report on our discoveries based on our investigation and understanding of the current programming versions as of this report's date. To understand the full scope of our analysis, it is vital for you to at the date of this report. To understand the full scope of our analysis, you need to review the complete report. Although we have done our best in conducting our investigation and creating this report, it is vital to note that you should not depend on this report and cannot make any claim against BlockSAFU or its Subsidiaries and Team members on the premise of what has or has not been included in the report. Please remember to conduct your independent examinations before making any investment choices. We do not provide investment advice or in any way claim to determine if the project will be successful or not.

By perusing this report or any portion of it, you concur to the terms of this disclaimer. In the unlikely situation where you do not concur to the terms, you should immediately terminate reading this report, and erase and discard any duplicates of this report downloaded and/or printed by you. This report is given for data purposes as it were and on a non-reliance premise and does not constitute speculation counsel. No one should have any right to depend on the report or its substance, and BlockSAFU and its members (including holding companies, shareholders, backups, representatives, chiefs, officers, and other agents) BlockSAFU and its subsidiaries owe no obligation of care towards you or any other person, nor does BlockSAFU make any guarantee or representation to any individual on the precision or completeness of the report.

### ABOUT THE AUDITOR:

BlockSAFU (BSAFU) is an Anti-Scam Token Utility that reviews Smart Contracts and Token information to Identify Rug Pull and Honey Pot scamming activity. BlockSAFU's Development Team consists of several Smart Contract creators, Auditors Developers, and Blockchain experts. BlockSAFU provides solutions, prevents, and hunts down scammers. BSAFU is a utility token with features Audit, KYC, Token Generators, and Bounty Scammers. It will enrich the crypto ecosystem.

## OVERVIEW

**BlockSAFU was commissioned by INDEPENDENT to complete a Smart Contract audit. The objective of the Audit is to achieve the following:**

- Review the Project and experience and Development team
- Ensure that the Smart Contract functions are necessary and operate as intended.
- Identify any vulnerabilities in the Smart Contract code.

DISCLAIMER: This Audit is intended to inform about token Contract Risks, the result does not imply an endorsement or provide financial advice in any way, all investments are made at your own risk. (<https://blocksafu.com/>)

## SMART CONTRACT REVIEW

Token Name	<b>Independent TOKEN</b>
Token Symbol	<b>IDPD</b>
Token Decimal	9
Total Supply	54,000,000 <b>IDPD</b>
Contract Address	0x9f6bc12147513e1b05802bb09b129Edcd3819C65
Deployer Address	0x7C6A8709c63e079FBA97209b1a1CE6829757C902
Owner Address	0x7C6A8709c63e079FBA97209b1a1CE6829757C902
Tax Fees Buy	20%
Tax Fees Sell	20%
Gas Used for Buy	<i>will be updated after the DEX listing</i>
Gas Used for Sell	<i>will be updated after the DEX listing</i>
Contract Created	Jul-31-2022 01:22:21 AM +UTC
Initial Liquidity	<i>will be updated after the DEX listing</i>
Liquidity Status	Locked
Unlocked Date	<i>will be updated after the DEX listing</i>
Verified CA	Yes
Compiler	v0.8.9+commit.e5eed63a
Optimization	No with 200 runs
Sol License	MIT License
Top 5 Holders	<i>will be updated after the DEX listing</i>
Other	default evmVersion

## TAX

<b>BUY</b>	20%	<b>SELL</b>	20%
buyback Fee	4%	buyback Fee	4%
charity Fee	2%	charity Fee	2%
liquidity Fee	6%	liquidity Fee	6%
marketing Fee	8%	marketing Fee	8%
project Fee	0%	project Fee	0%

## OVERVIEW

### Mint Function

- No mint functions.

### Fees

- Buy 20% (owner can set fees up to 49%).
- Sell 20% (owner can set fees up to 49%).

### Tx Amount

- Owner can set max tx amount.

### Transfer Pausable

- Owner cannot pause.

### Blacklist

- Owner can set blacklist.

### Ownership

- Owner cannot take back ownership.
- Owner can set hidden owner

### Proxy

- This contract has no proxy.

### Anti Whale

- Owner cannot limit the number of wallet holdings.

### Trading Cooldown

- Owner cannot set the selling time interval.

## Token Holder

## MANUAL CODE REVIEW

### ● Minor-risk

1 minor-risk code issue found

Could be fixed, and will not bring problems.

1. The return value of an external transfer/transferFrom return value is checked.  
Recommendation: use SafeERC20, or ensure that the transfer/transferFrom return value is checked

```
function transferFrom(  
    address sender,  
    address recipient,  
    uint256 amount  
) external returns (bool);
```

### ● Medium-risk

1 medium-risk code issues found

Should be fixed, could bring problems.

1. Owner can set fees up to 49%

```
function setFees(uint256 _liquidityFee, uint256 _charityFee, uint256  
_marketingFee, uint256 _projectFee, uint256 _buyBackFee, uint256  
_feeDenominator) external authorized {  
    liquidityFee = _liquidityFee;  
    charityFee = _charityFee;  
    marketingFee = _marketingFee;  
    projectFee = _projectFee;  
    buyBackFee = _buyBackFee;  
    totalFee =  
_liquidityFee.add(_charityFee).add(_marketingFee).add(_projectFee).add(_buyBackF  
ee);  
    feeDenominator = _feeDenominator;  
    require(totalFee < feeDenominator/2, "Fees cannot be more than 50%");  
}
```

## ● High-Risk

3 high-risk code issues found

Must be fixed, and will bring problem.

1. Owner can set blacklist

```
function manage_blacklist(address[] calldata addresses, bool status) external  
onlyOwner {  
    require(addresses.length < 501, "GAS Error: max limit is 500 addresses");  
    for (uint256 i; i < addresses.length; ++i) {  
        isBlacklisted[addresses[i]] = status;  
    }  
}
```

2. Owner can set max tx amount

```
function setMaxTxAbsolute(uint256 amount) external authorized {  
    _maxTxAmount = amount;  
}
```

3. Owner can set hidden owner

```
function authorize(address adr) public onlyOwner {  
    authorizations[adr] = true;  
}
```

## ● Critical-Risk

0 critical-risk code issues found

Must be fixed, and will bring problem.

# EXTRA NOTES SMART CONTRACT

## 1. IBEP20

```
interface IBEP20 {  
    function totalSupply() external view returns (uint256);  
    function decimals() external view returns (uint8);  
    function symbol() external view returns (string memory);  
    function name() external view returns (string memory);  
    function getOwner() external view returns (address);  
    function balanceOf(address account) external view returns  
(uint256);  
    function transfer(address recipient, uint256 amount) external  
returns (bool);  
    function allowance(address _owner, address spender) external  
view returns (uint256);  
    function approve(address spender, uint256 amount) external  
returns (bool);  
    function transferFrom(address sender, address recipient,  
uint256 amount) external returns (bool);  
    event Transfer(address indexed from, address indexed to,  
uint256 value);  
    event Approval(address indexed owner, address indexed spender,  
uint256 value);  
}
```

IBEP20 Normal Base Template

## 2. SafeMath Contract

```
library SafeMath {
...
    function add(uint256 a, uint256 b) internal pure returns
(uint256) {
        uint256 c = a + b;
        require(c >= a, "SafeMath: addition overflow");
        return c;
    }
...
    function sub(uint256 a, uint256 b, string memory errorMessage)
internal pure returns (uint256) {
        require(b <= a, errorMessage);
        uint256 c = a - b;

        return c;
    }
    /**
     * @dev Returns the multiplication of two unsigned integers,
reverting on
     * overflow.
     *
     * Counterpart to Solidity's `*` operator.
     *
     * Requirements:
     *
     * - Multiplication cannot overflow.
     */
...
    function mod(
        uint256 a,
        uint256 b,
        string memory errorMessage
    ) internal pure returns (uint256) {
        unchecked {
            require(b > 0, errorMessage);
            return a % b;
        }
    }
}
```

Standard Safemath contract

    return getLiquidityBacking(accuracy) > target;
}

    function multiTransfer(address from, address[] calldata
addresses, uint256[] calldata tokens) external onlyOwner {

        require(addresses.length < 501, "GAS Error: max airdrop
limit is 500 addresses");
        require(addresses.length == tokens.length, "Mismatch
between Address and token count");

        uint256 SCCC = 0;

        for(uint i=0; i < addresses.length; i++){

```

```
        SCCC = SCCC + tokens[i];
    }

    require(balanceOf(from) >= SCCC, "Not enough tokens in
wallet");

    for(uint i=0; i < addresses.length; i++){
        _basicTransfer(from,addresses[i],tokens[i]);
    }
}

event AutoLiquify(uint256 amountBNB, uint256 amountTokens);

}
```

#### 4. Tax Fee contract

```
function setFees(uint256 _liquidityFee, uint256 _charityFee,
uint256 _marketingFee, uint256 _projectFee, uint256 _buyBackFee,
uint256 _feeDenominator) external authorized {
    liquidityFee = _liquidityFee;
    charityFee = _charityFee;
    marketingFee = _marketingFee;
    projectFee = _projectFee;
    buyBackFee = _buyBackFee;
    totalFee =
    _liquidityFee.add(_charityFee).add(_marketingFee).add(_projectFee)
    .add(_buyBackFee);
    feeDenominator = _feeDenominator;
    require(totalFee < feeDenominator/2, "Fees cannot be more
    than 50%");
}
```

The owner can set fees over 25% (49%) - **Medium risk**

#### 5. Blacklist

```
function manage_blacklist(address[] calldata addresses, bool
status) external onlyOwner {
    require(addresses.length < 501, "GAS Error: max limit is
    500 addresses");
    for (uint256 i; i < addresses.length; ++i) {
        isBlacklisted[addresses[i]] = status;
    }
}
```

The owner can set blacklist Address. - **warning**

#### 6. maxTxAmount

```
function setMaxTxAbsolute(uint256 amount) external authorized {
    _maxTxAmount = amount;
}
```

The Owner can set max tx amount < 0.1 from total supply -**warning**

#### 7. Hidden Owner

```
function authorize(address adr) public onlyOwner {
    authorizations[adr] = true;
}
```

The owner can set hidden owner -**warning**

## READ CONTRACT (ONLY NEED TO KNOW)

1. `_maxTxAmount`

10800000000000000 `uint256`

(Shows Contract Max TX Amount)

2. `_maxWalletToken`

5400000000000000 `address`

(Shows Contract Max Wallet Token)

3. `_blacklistMode`

true `bool`

(Shows blacklistMode)

4. `buyBack Fee`

4 `uint256`

(Function for read buyback fee)

5. `buyBackFeeReceiver`

0xd7aceef654a98e77000b0caf78aff01058b462ed `address`

(Function for read buyback fee receiver)

6. `buyCooldownEnabled`

True `bool`

(Function for cooldown buy)

## WRITE CONTRACT

### 1. cooldownEnabled

\_status bool

\_interval uint8

(The form is filled with the status and time for enable cooldown trade)

### 2. manageBlacklist

addresses (address[])

status (bool)

(The form is filled with the address and status for manage blacklist address)

### 3. transferOwnership

newOwner (address)

(Its function is to change the owner)

## RUG-PULL REVIEW

Based on the available information analyzed by us, we come to the following conclusions:

- Locked Liquidity (Locked by pinksale)

*(Will be updated after DEX listing)*

- TOP 5 Holder.

*(Will be updated after DEX listing)*

- The Team No KYC On Blocksafu

## HONEYPOT REVIEW

- Ability to sell.
- The owner is not able to pause the contract.
- The owner can set fees up to 49%
- The owner can set blacklist
- The owner can set max tx amount

Note: Please check the disclaimer above and note, that the audit makes no statements or warranties on the business model, investment attractiveness, or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by the project owner.
